Reissue Applications

In accordance with 37 CFR 1.175(b)(1), a supplemental reissue oath/declaration under 37 CFR 1.175(b)(1) must be received before this reissue application can be allowed.

Claims 4-9, 13, 30, 31, 33-37 are rejected as being based upon a defective reissue under 35 U.S.C. 251. See 37 CFR 1.175. The nature of the defect is set forth above.

Receipt of an appropriate supplemental oath/declaration under 37 CFR 1.175(b)(1) will overcome this rejection under 35 U.S.C. 251. An example of acceptable language to be used in the supplemental oath/declaration is as follows:

“Every error in the patent which was corrected in the present reissue application, and is not covered by a prior oath/declaration submitted in this application, arose without any deceptive intention on the part of the applicant.”

See MPEP § 1414.01.

Claims 33, 35 and 37 are rejected under 35 U.S.C. 102(e) as being anticipated by Michelson US Patent 5,484,437.

Art Unit: 3774

Michelson discloses a method of inserting an intervertebral implant having the steps of after removal of an intervertebral disc (not necessarily has to be the whole disc), forming a first indentation in a first endplate, the first indentation having a middle portion (crest of bore) deeper than a circumferential rim (the broadest meaning of the word: circumferential in the Merriam_Webster dictionary is ---the external boundary or surface of a figure or object---. Therefore, the middle portion of the bore where the edge of the endplate is located is the circumferential rim. And then fixedly mating a first and second surfaces to the first and a second indentation on the endplates.
